

Lab 2: Agile backlog creation & Sprint simulation in Jira

SRN: PES1UG24CS509

Name: V.Saatwik

Section: I

Jira backlog with Epics and User Stories. (Screenshot 1)

The screenshot displays the Jira interface for a project named 'EV Charging Reservation System'. The left sidebar shows navigation options like 'For you', 'Recent', 'Starred', 'Apps', 'Plans', 'Spaces', 'Teams', 'Goals', and 'Projects'. The main area shows the 'EV board' with a list of items. The items are organized into epics and user stories. The table below represents the data shown in the screenshot.

Item	Work	Assignee	Reporter	Priority	Status
EV-1	1.Station discovery and navigation	V Saatwik	V Saatwik	High	To Do
EV-2	Search for stations with compatible charging...	V Saatwik	V Saatwik	High	To Do
EV-3	View real time availability of compatible char...	V Saatwik	V Saatwik	Medium	To Do
EV-4	Real time navigation to the charging points th...	V Saatwik	V Saatwik	Highest	To Do
EV-5	Charging reservation management	V Saatwik	V Saatwik	Highest	To Do
EV-6	Reserve charging slot	V Saatwik	V Saatwik	High	To Do
EV-7	Prevent double booking or duplicate reservat...	V Saatwik	V Saatwik	Highest	To Do
EV-8	Cancel reservation	V Saatwik	V Saatwik	Medium	To Do
EV-9	Charging station operations	V Saatwik	V Saatwik	Medium	To Do
EV-10	Operator Charger Health & Maintenance Ov...	V Saatwik	V Saatwik	Medium	To Do
EV-11	Manage charger availability	V Saatwik	V Saatwik	Medium	To Do
EV-12	Update socket availability	V Saatwik	V Saatwik	Medium	To Do

Story point assignments. (Screenshot 2)

The screenshot shows the Jira interface for the "EV Charging Reservation System" project. The "Backlog" view is active, displaying a list of 9 work items. Each item includes a story key, a title, a type (e.g., Story, Task), a status (e.g., To Do), a priority (e.g., High, Medium), and a story point value. The items are sorted by priority and then by story points.

Story Key	Title	Type	Status	Priority	Story Points
EVR-2	Search for stations with compatible charging points	Story	To Do	High	4
EVR-4	Real time navigation to the charging points through GPS	Story	To Do	High	5
EVR-3	View real time availability of compatible charging points	Story	To Do	High	3
EVR-6	Reserve charging slot	Task	To Do	Medium	4
EVR-7	Prevent double booking or duplicate reservations for the same tim...	Task	To Do	Medium	5
EVR-8	Cancel reservation	Task	To Do	Medium	3
EVR-10	Operator Charger Health & Maintenance Override	Task	To Do	Medium	3
EVR-11	Manage charger availability	Task	To Do	Medium	3
EVR-12	Update socket availability	Task	To Do	Medium	3

Burndown Chart. (Screenshot 4)

Sprint 1

Sprint 2

Reflection Questions:

1. Did your estimations reflect the actual effort?

On an overall sense the estimations reflected the actual effort but since this was a simulation the time taken to complete the sprint was very quick as this simulation was for demonstration purposes.

2. Was your backlog well-prioritized?

Yes, critical requirements were given the highest priority while important functional requirements were given high priority. Other tasks were given a medium priority.

3. How did your simulated sprint align with your plan?

The sprint mostly aligned with the plan, most of the highest priority tasks were performed in the sprint so that it can be validated with the user and iterated over later.

4. What insights did the burndown chart give about your team's capacity?

The burndown chart showed the reduction in remaining work during the sprint and helped us understand the team's capacity, progress, and whether the planned work could be completed on time.
